when agitators managed to enter the palace during a manifestation.

There were cheers for Russia and for Italian metal workers, and demands were made that supplies and stores in warehouses be turned overto the people through the medium of a food dictatorship. The red and black Communist flag waved from the balcony during this discourse, but there was no disorder, and the authorities did not interfere.

The radicals also directed attacks at the national Legislature and the Supreme Court. Some of the orators declared two bombs were ready for each Mexico City newspaper, all of which were denounced as "organs of capitalism and enemies of the workers."

Among the suggestions launched from the palace balcony were the dynamiting of the archbishop's palace, the erection of a gillotine for all journalists in the Central Plaza.

(By Associated Press.)

CHICAGO, Sept. 27.—A general reduction in food prices was predicted today by Sol Westerfeld, president of the Retail Grocers' Association, who excepted only eggs and butter from what he said would be a steady decline. He said high interests on bank loans made price-cutting necessary for producers to move their crops.

Mr. Westerfeld said canned goods now being packed must be lowered in price to move it: that coffee had recently dropped 10 cents a pound, and that he looked for cheaper bread because of lower flour prices. Fruit was at a minimum, in some case lower than 1914 prices, he said.

"Although it may mean loss to some producers and distributors," he said, "the nation as a whole will benefit, and a return to normal conditions will be effected."

"FAKE" FRUIT BEVERAGES

Pure Food Act Will Apply Where Customers Are Misled as to Drinks' Composition.

By Associated Press.]

WASHINGTON, Sept. 27.—Warning against "fake" fruit beverages which have flooded the soft drink market since the advent of prohibition was issued today by the puolic health service. Many of the orange beverages now being sold, it was said, consist only of sweetened carbonated water, flavored with a little oil from the peel of oranges and artificially colored. The Department of Agriculture has ruled that provisions of the pure food act will be held to have been violated in case such drinks are sold under trade names which leads the purchaser to believe they contain the edible portion or juice of the fruit named.

Let us end mistakes in shaving

Hot towels and finger-rubbing no longer necessary

TET us all know the present day facts on shaving. There is no need to use hot towels to soften the beard. Nor to rub the beard. Nor to submit our face to a lather that dries quickly on the face and irritates

Once such things were considered a necessary evil in shaving. But they are without reason today. For science has found a better way of preparing the beard for the razor. An easier way. And a quicker way. It lies in the use of Palmolive Shaving Cream. And to show what a big difference it makes in shaving, we are sending a trial tube free to every man who re-

Quick action

The secret of softening the beard is in emulsifying the oil that coats every hair of the beard. And Palmolive lather instantly emulsifies that oil. Then the bearda horny substance - quickly absorbs water. This makes the hair easy to cut. With the ordinary cream or soap you have to supply hot towels or rub the beard before it can be thoroughly moist-

Lasting lather

Palmolive lather stays moist and foamy on the face for 10 minutes. You don't have to relather as you do with the ordinary cream.

This lather is also a lotion. It contains palm and olive oils. Thus your skin is soothed and refreshed in shaving. You need no other lotion.

A new kind of a shave

You'll change your whole conception of shaving when you use Palmolive. And this we urge you to do at once. A trial tube will be sent free. There is no charge of any kind, not even for postage. So be sure to take advantage of this opportunity. Mail the cou-
